

A CARIB PLATE BONUS GUIDE

The Cheat Day Calorie Guide

Real numbers for the days you're not cooking — so you can
stay on track even when life happens.

EXCLUSIVE LAUNCH WEEK BONUS

Eating Out Doesn't Mean Falling Off

Your 30-Day Plan is built around real Caribbean meals — but life happens. Sometimes you're traveling, working late, or just need a break from cooking. This guide exists so a fast food stop doesn't have to derail your goals.

Inside, you'll find calorie and protein breakdowns for popular options at seven chains — both international names you'll find almost anywhere, and Caribbean spots that mainstream guides never bother to cover.

01

Plan, don't panic

Knowing the number before you order beats guessing after you've eaten.

02

Small swaps add up

Each entry includes one simple swap that meaningfully lowers the calorie count.

03

One meal isn't the whole day

A higher-calorie meal can still fit — just adjust what comes before and after it.

A NOTE ON ACCURACY

Figures for international chains (McDonald's, Burger King, KFC, Subway, Wendy's, Popeyes) come from each brand's official published nutrition data and are marked **Verified**. Figures for Caribbean regional chains are marked **Estimated** — these chains don't publish official nutrition information, so values are approximated based on comparable dishes and standard preparation methods. Use estimated figures as a reasonable guide, not an exact science.

INTERNATIONAL CHAINS

McDonald's

BURGERS & FRIES

VERIFIED — OFFICIAL DATA

Hamburger

250 CALORIES	12g PROTEIN	9g FAT	31g CARBS
-----------------	----------------	-----------	--------------

Smart swap: Skip the bun's top half or ask for no cheese to save roughly 50-80 calories without losing the protein.

4-Piece Chicken McNuggets

170 CALORIES	9g PROTEIN	11g FAT	10g CARBS
-----------------	---------------	------------	--------------

Smart swap: Pair with a side salad instead of fries to add volume and nutrients for very few extra calories.

Source: McDonald's official Nutrition Calculator, mcdonalds.com

Burger King

BURGERS & SANDWICHES

VERIFIED — OFFICIAL DATA

Whopper (no cheese)

660 CALORIES	28g PROTEIN	40g FAT	49g CARBS
-----------------	----------------	------------	--------------

Smart swap: Order without mayo to cut roughly 90 calories instantly while keeping all the protein and flavor.

Source: Burger King official nutrition data, bk.com

KFC

FRIED CHICKEN

VERIFIED — OFFICIAL DATA

Original Recipe Chicken Breast

390 CALORIES	39g PROTEIN	21g FAT	11g CARBS
-----------------	----------------	------------	--------------

Smart swap: Remove the skin to cut calories to roughly 280 and fat nearly in half, while keeping almost all the protein.

Original Recipe Drumstick

130 CALORIES	10g PROTEIN	8g FAT	3g CARBS
-----------------	----------------	-----------	-------------

Smart swap: Choose drumsticks or wings over breast pieces — same flavor, meaningfully fewer calories per piece.

Source: KFC official nutrition data, kfc.com

Subway

SANDWICHES

VERIFIED — OFFICIAL DATA

6" Turkey Breast (standard build, no cheese/sauce)

280 CALORIES	18g PROTEIN	4.5g FAT	46g CARBS
-----------------	----------------	-------------	--------------

Smart swap: Choose mustard or red wine vinegar over mayo or ranch — can save up to 200+ calories on a footlong.

Source: Subway official U.S. Nutrition Information document, subway.com

Junior Cheeseburger

300 CALORIES	16g PROTEIN	13g FAT	28g CARBS
-----------------	----------------	------------	--------------

Smart swap: A junior-size burger gives you the satisfaction with roughly half the calories of a full-size combo item.

Source: Wendy's official nutrition guide, wendys.com

Popeyes

FRIED CHICKEN & SANDWICHES

Classic Chicken Sandwich

700 CALORIES	28g PROTEIN	42g FAT	50g CARBS
-----------------	----------------	------------	--------------

Smart swap: Skip the mayo-based sauce to save roughly 90-100 calories — the buttermilk breading carries plenty of flavor on its own.

Source: Popeyes official nutrition data, popeyes.com

CARIBBEAN CHAINS & STREET FOOD

Royal Castle

FRIED & GRILLED CHICKEN

2-Piece Fried Chicken (no sides)

~420 CALORIES	~32g PROTEIN	~26g FAT	~12g CARBS
------------------	-----------------	-------------	---------------

Smart swap: Where available, choose grilled or rotisserie chicken over fried — typically cuts fat substantially while keeping protein high.

Fish Sandwich

~480 CALORIES	~22g PROTEIN	~24g FAT	~45g CARBS
------------------	-----------------	-------------	---------------

Smart swap: Ask for tartar sauce on the side rather than added — a few tablespoons can carry 100+ calories on their own.

Estimated based on comparable fried chicken and fish sandwich preparations. Royal Castle does not publish official nutrition data.

Roadside Doubles & Roti Stands

STREET FOOD

Doubles (2 standard)

~380 CALORIES	~9g PROTEIN	~14g FAT	~56g CARBS
------------------	----------------	-------------	---------------

Smart swap: Ask for light pepper and skip extra channa gravy on the side — the bara (fried dough) is the main calorie driver, not the channa itself.

Chicken Roti (1 wrap)

~650 CALORIES	~30g PROTEIN	~28g FAT	~68g CARBS
------------------	-----------------	-------------	---------------

Smart swap: Share one roti between two people or save half for later — portion size, not the dish itself, is usually what pushes this high.

Estimated based on standard preparation methods. Values vary significantly by vendor and portion size — independent stands do not publish nutrition data.

**Real food.
Real numbers.
No guilt.**

This guide is part of your 30-Day Caribbean Meal Planner bonus package. Use it whenever life pulls you off the plan for a meal — then get right back to it tomorrow.
